

Love Again

[Andy Moor & Betsie Larkin](#)

Something takes a hold of me
Something makes it hard to breath
I'm no good at in between
We're all in or you're just not for me I have braved this upward climb
And I have walked the tightrope high
Watched it all come crashing down
Do you see my plight?
But somehow you found me I never thought I'd love again
But you're here right now
And I can't walk away I thought my chance had come and gone
But there's nowhere else
That I want to stay but here with you
Someone taught me how to love
How I wish that was enough
Over time it came undone
I thought that chance
Would just come once I was afraid to look around
I kept my eyes stuck on the ground
Then I found there's something more
Than what I had before
I'm so glad you found me I never thought I'd love again
But you're here right now
And I can't walk away I thought my chance had come and gone
But there's nowhere else
That I want to stay but here with you
Here with you
Here with you
Here with you
Here with you There's nowhere else that I
Want to stay but here with you
