Sarcastrophe

Slipknot

Wallow in the winter of it

Discover what you truly covet

Underneath and far above it

You slither in all kinds of Shit

How could you forget about it?

Did you think you could minimize?

This is the age of consent

You'll get a day in the sun

Before I kill your fucking lights

Burn up in your atmosphere

Burn up in your utmost fear

Desecrate your temples

Only hell and hate remain

Don't look for crows to scatterPrepare for judgment day

We are kill gods

The kings are falling down

Can I find a way to get there?

Bury your head in the ground

Will you falsify for your fair share?

When it's done, it's done

Plus negative one

It's everybody's guess but the apathy won

Will you come testify in the court of myopic opinion?

Or will you settle for oblivion? We are kill gods (We) We make this world worth saving

(Are) Are you prepared to believe?

(Kill) Kill everything that kills you

(Gods) Live long and die for meRape crutch and sick

In the middle of

An evidence bag that'll never obey

All these years spent hiding all the bodiesI can never be sure but I remember the graves

We are kill gods

(We) We make this world worth saving

(Are) Are you prepared to believe?

(Kill) Kill everything that kills you (Gods)

Live long and die for me

Live long and die for me

Live long and die for me
