

Home (feat. Richard Caddock)

Laszlo

A horizon lights up in the palm of my hands
I reach out to grab the edge
Was it a reaction to the rainfall
That made the lights reflect overhead
Whisper something sweet over the city
To counter the bitter air
I will be listening for you
The chains were too hard to bare
I believe there's a place
Where I belong and you do too
It's not far away
If only it were true
I believe that the weights
Won't take me down when I'm not alone
I cannot come back this time
No, I'm not coming home
Now that I've been long gone
Have you missed me at all?
The road home shatters and I feel the pressure
Of direction taking over me
If I'm moving through space
In an endless night
It's you that set me free
I believe there's a place
Where I belong and you do too
It's not far away
If only it were true
I believe that the weights
Won't take me down when I'm not alone
I cannot come back this time
No, I'm not coming home
It's, not
Far away
I'm, not
Coming home
