

# Precious (feat. Shy Carter)

Aston Merrygold

There's a certain way I live my life  
I don't know many do-things-twice  
Have my hands up in the clouds  
And my feet are on the ground  
Just that birthdays come and go  
I don't wanna make 'em cry no more  
Player's life is overrated  
That's what they don't know  
I've been looking for the one for ages  
Guess It's time to turn the pages  
Delete that, I don't need the playlist This one's the favourite  
This one's the favourite  
This one's the favourite  
Yeah you, yeah you're the favourite  
Everything about you got me up all night  
Never been in love but I'm in love tonight  
Praise for this she breaks the model  
She got those curves called a bottle This one's the favourite  
This one's the favourite  
This one's the favourite Everything it sounds the same  
Same old shit but a different day  
All that they know is my name  
Like Lois to Superman This one is my kryptonite  
She's my weakness day and night  
I can't help but wonder why  
Her body is too bootylicious for me  
This one's the favourite  
This one's the favourite  
Yeah you, yeah you're the favourite  
Everything about you got me up all night  
Never been in love but I'm in love tonight  
Praise for this she breaks the model  
She got those curves called a bottle  
Players will be players  
But you changed the game Now the world I know will never be the same  
Praise for this she breaks the model  
She got those curves called a bottle  
I've been looking for the one for ages  
'Bout time somebody got me turning the pages  
Can't believe I'm about to say this  
Delete that, I'm off the playlist  
Doctor got a new sensation Think It's my heart give me palpitations

Step back, gotta make a statement  
This one's the favourite  
Everything about you got me up all night  
Never been in love but I'm in love tonight  
Praise for this she breaks the model  
She got those curves called a bottle This one's the favourite  
Players will be players  
But you changed the game  
Now the world I know will never be the same  
Praise for this she breaks the model  
She got those curves called a bottle  
This one's the favourite
