

# Tourniquet

## Tesseract

I'll wait for you;  
run wild and aspire  
Thrive  
burn young fire  
When you say "fight back" our love won't tire  
Unweathered and untethered light I promise you and I will see it through  
You lay dreaming  
No time to sleep as I begin to weep  
Life is fleeting  
I tighten fast inside your tourniquet  
Stop the bleeding  
Your tenderness, your softened skin  
All I needed  
Your love is my tourniquet  
Learn to rise, contain the pressure  
This was supposed to be no miracle  
Bow down because I'm under pressure once again  
I promise you, I promise you  
Take my strength  
I honour you with everything  
Take my strength  
I promise you and I will see it through  
Am I dreaming?  
The endless light you shine on me  
All I needed
