## Tourniquet

## **TesseracT**

I'll wait for you; run wild and aspire Thrive burn young fire When you say "fight back" our love won't tire Unweathered and untethered lightI promise you and I will see it through You lay dreaming No time to sleep as I begin to weep Life is fleeting I tighten fast inside your tourniquet Stop the bleeding Your tenderness, your softened skin All I needed Your love is my tourniquet Learn to rise, contain the pressure This was supposed to be no miracle Bow down because I'm under pressure once again I promise you, I promise you Take my strength I honour you with everything Take my strength I promise you and I will see it through Am I dreaming? The endless light you shine on me All I needed
