

# Out of the Body

## Pestilence

In the darkness  
They crawl on places  
Where you can't see or hear they come  
Marching silently  
When it's dawn they will be gone  
A swelling on my body  
Makes me suffer, live in anxiety  
No time to waste  
Just open the abcess, will you please help me  
The ignorance is dominating  
Remedies you try  
I can not live this life any longer  
What is it and why?  
While you're asleep  
They'll enter your skin  
The search for the new place they will dwell  
They give their children  
A place to be born  
You won't notice except for the smell  
Mysteriousness, researches can't explain  
The sorrow of this eternal pain  
It's burning stronger day by day  
Cure me, there must be a way  
Desperation, confused mind  
Never heard of the disease of this kind  
So tell me what can I do  
To leave this HELL I'm going through  
Human blood  
The perfect place  
Birth of descendants  
Creatures living  
In my veins the horror  
Frightening, sickening  
The pain that I am bearing  
Begging, please get them  
Out of my body
