

# Giorgio by Moroder

## Daft Punk

When I was fifteen, sixteen when I started really to play the guitar  
I definitely wanted to become a musician  
It was almost impossible because the dream was so big  
I didn't see any chance because I was living in a little town, I was studying.  
And when I finally broke away from school and became a musician  
I thought "well I may have a bit of a chance"  
Because all I every wanted to do is music but not only play music  
But compose music.  
At that time, in Germany, in 1969-70, they already had discotheques  
So I would take my car and go to a discotheque and sing maybe 30 minutes  
I think I had about 7-8 songs.  
I would partially sleep in the car  
Because I didn't want to drive home and that help me for about almost 2 years  
To survive.  
In the beginning,  
I wanted to do a album with the sound of the 50s, the sound of the 60s, of the 70s  
And then have a sound of the future.  
And I said: "Wait a second?"  
I know the synthesizer, why don't I use the synthesizer which is the sound of the future."  
And I didn't have any idea what to do but I knew I needed a click so we put a click on the 24  
track  
which was then synch to the moog modular.  
I knew that it could be a sound of the future but I didn't realise how much impact it would  
be. My name is Giovanni Giorgio, but everybody calls me Giorgio.  
You want to free your mind about a concept of harmony and of music being correct,  
You can do whatever you want.  
So nobody told me what to do,  
And there was no preconception of what to do.
