

# Fireflies (feat. Christina Novelli) [ATSY Remix]

Roman Messer

Goodbye, city lights  
And we stop, fire's burning up tonight  
Open your eyes no pain Getting closer to the flame  
We were born to take the night When you look up, the sky is falling  
And soon we'll be gone but not forgotten  
We're the last of the fireflies  
It ends tonight  
But when it falls, I'm by your side  
And in the dark we burn so bright  
We're the last of the fireflies (flies)  
We're the last of the fireflies (flies)  
We're the last of the fireflies  
When you look up, the sky is falling  
And soon we'll be gone but not forgotten  
We're the last of the fireflies I'm so, take it high  
Feel your head rush when we paint the sky  
Open your eyes no pain  
Getting closer to the flame  
We were born to take the night  
When you look up, the sky is falling  
And soon we'll be gone but not forgotten  
We're the last of the fireflies (flies)  
We're the last of the fireflies (flies)  
We're the last of the fireflies
