

Fingerprints

Eli Young Band

One more drink and then you'll go
But that's a lie because we both know
How this starts and how it ends
We go down this road again You take my hand and pull me tight
Turn up the heat turn down the light
You won't stop until my skin is covered with your fingerprints You showed back up I'd let you
in every time
You end up running like you're running from a scene of a crime
You know how to make your make your mark
You know how to take a take a heart
Break it all to pieces burn it with a touch
You're gonna leave them leave them with nothin but
Fingerprints
The sun beats through the morning blinds
Not a trace of you in sight
I tell myself blame her again as I wash away your fingerprints You showed back up I'd let you
in every time
You end up running like you're running from a scene of a crime
You know how to make your make your mark
You know how to take a take a heart
Break it all to pieces burn it with a touch
You're gonna leave them leave them with nothin but
Fingerprints
Ohh yeah, fingerprints
There's just some things that you can't change
Fingerprints
No matter what the stay the same
Fingerprints
You showed back up I'd let you in every time
You end up running like you're running from a scene of a crime
You know how to make your make your mark
You know how to take a take a heart
Break it all to pieces burn it with a touch
You're gonna leave them leave them nothin but
Fingerprints
Your fingerprints
