Live Wire

Beastie Boys

I know where you got to be going but you don't know why I see things I ought not to know but I can't help life You never knew my heart for you was monster sizeYou're a live wire You're a live wireLet me know if you want to check out for the all time high My man told me long hellos and short goodbyes But you are something else I love you please don't dieYou're a live wire You're a live wire
