To the Sky

Maps

My memory Feels like it's playing with me These things I know Yeah, I knowThe sun will end with you Need help to cut on through Can only feel this way When silence comesI can sing it to the sky There's a risk it won't reply If I could change it, man I would And I won't screw it up this timeBeen here before It won't happen no more These things I know Yeah, I know They get into your mind I guess you know the signs Can only feel this way When silence comesI can sing it to the sky There's a risk it won't reply If I could change it, man I would And I won't screw it up this timeI can sing it to the sky There's a risk it won't reply If I could change it, man I would And I won't screw it up this timeI can sing it to the sky There's a risk it won't reply If I could change it, man I would And I won't screw it up this time I can sing it to the sky There's a risk it won't reply If I could change it, man I would And I won't screw it up this time
