Temptation

Dizzee Rascal

Gotta keep my head above water Gotta stay head-strong, keep rolling on No point getting caught in the hype is long Like I don't know right from wrongSo I gotta be real, nothing to prove I'm still big in the hood, I feel so in control I'm chill, no one ain't knocking off dill So I stay top on the billI'm the main event, the headliner Went from jungle DJ to rhymer Never thought I would be the big timer But I still par it like, yo, it's a minor'Cause I still rep my ends, still check my friends Can I keep it up? I guess, it all depends If I can keep my mind right, don't get tempted By the limelight, I think I'll be alright Temptation leads you like your naughty mate The one that used to get you in bother The one you can never bring yourself to hateCan't avoid the temptation But I know, I gotta change my ways And keep my nose clean, gotta fix up Take a look at my life 'cause I ain't sixteenAnd I ain't no boy, ain't no kid The world ain't flat and the picture's big Certain things that I gotta get rid And a whole lot more that I gotta get withSo I gotta stay and roam on my own Gotta move on, I can't stay at home 'Cause I know what's there is all the same Crack, cocaine and ghetto fame Cold hard cash and a bit of a name And I've see it all, so I need a change Lost too many brethrens to the game And you could say temptation's to blameTemptation leads you like your naughty mate The one that used to get you in bother The one you can never bring yourself to hate Temptation leads you like your naughty friendsWe used to be tight, me and my naughty friends Caused pure madness in the ends, I mean day and night We robbed, we stole, we loved to fight Smoking, drinking, joyriding, drugs, thugs, not law-abidingReckless youngsters, no direction, no sign of correction But then I switched it up, changed my ways Got in the area like, "Oh my days" But not my naughty friends, they're not fazed Can't believe that this music paysSee no reason why we can't do All the things that we've always done Still in my heart I know that's just wrong

But it's hard to fight the temptation, sonTemptation leads you like your naughty mate The one that used to get you in bother The one you can never bring yourself to hate Temptation leads you like your naughty friends Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
