

# Stay (Teddy Riley 'Eternal' Mix)

## Eternal

I want you to stay, never go away from me  
Stay forever  
But now, now that you're gone  
All I can do is pray for you  
To be here beside me again Why did you have to leave me?  
When you said that love will conquer all?  
Why did you have to leave me?  
When you said that dreaming was as good as reality? And now I must move on  
Trying to forget all the memories of you and me  
But I can't let go of your love that has taught me  
To hold on  
I want you to stay, never go away from me  
Stay forever  
But now, now that you're gone  
All I can do is pray for you  
To be here beside me again Why did you have to leave me?  
When you said that love will conquer all?  
Why did you have to leave me?  
When you said that dreaming was as good as reality? And now I must move on  
Trying to forget all the memories of you and me  
But I can't let go of your love that has taught me  
To hold on Why did you have to leave me?  
When you said that love will conquer all?  
Why did you have to leave me?  
When you said that dreaming was as good as staying with me?  
Why did you have to leave me?  
When you said that love will conquer all?  
Why did you have to leave me?  
When you said that dreaming was as good as reality? I want you to stay, never go away from me  
Stay forever  
I want you to stay, never go away from me  
Stay forever
