

# Pulsar (Edit)

## Ride

You can never see me shine like I always wanted you to  
There's something in the way  
Or you miss it again and again  
Still shimmer holding out, always beaming over to you  
So very far away  
I hope it gets there still Like the summer always fades and the wind gets cool on your skin  
You know that something was, will never be again  
We glimmer in the dark of a life we haven't known  
Sometimes another one can let you know that you're there  
Always keep your eyes on the pulsar  
Guiding you home from wherever you are  
We're on our way home from another star  
It's been so long and we've come so far  
We've come so far
