

Dynamite (feat. Christina Novelli)

Gareth Emery

Watching the sky light fall to black
Feeling like the lights never coming back, no
When it's dark, and there's no one
I will be here, I'll be here And its all for you
Every spark in every flame
All for you

And all the stars will know your name Like a blazing light, ready to ignite

We are made of dynamite

Fireflies burning through the night

We are made of dynamite Like a blazing light, ready to ignite

We are made of dynamite

Fireflies burning through the night

We are made of dynamite

Like a blazing light, ready to ignite

We are made of dynamite

Fireflies burning through the night

We are made of dynamite

Blazing light

We'll show

Blazing light

We'll show
