

Good People

Little Big Town

They say you are who you hang with
It's no coincidence I wanna hang with you
Rise and fall together and trouble is better in two
Sometimes it feels like a magnet
The way that crazy always sticks with its own kind
I don't believe in ESP but you can read my mind
Good people know, good people know
Good people
Good people know, good people know
Good people
A good friend would bail you outta jail
But a better one would be handcuffed to you
Everyone's a winner when all the winners lose
Good people know, good people know
Good people
Good people know, good people know
Good people
You can always spot another one when they're nearby
No matter where you look, you're gonna find
Good people know, good people know
Good people
We're guilty by association
Keepin' company with ornery company
Runnin' around with rogues and rounders 'cause we believe
Good people know, good people know
Good people
Good people know, good people know
Good people
You can always spot another one when they're nearby
No matter where you look, you're gonna find
Good people know, good people know
Good people
Good people know, good people know
Good people
