

# Faces

## 2 Unlimited

Look around you  
What do those faces tell you? Faces, joy and pain  
Faces  
All around different faces I see  
Some are happy, some in misery  
They express joy and pain  
No two faces are the same. People, people all over town  
Some of them are poor and others wear a crown  
I've seen alot of many faces  
Joy and pain in different places  
Open your mind, set yourself free  
Figure it out, what could it be?  
Sympathise, understand  
Give love and peace to the other fellow man  
Faces  
Faces, joy and pain  
Look around you  
Do you see those faces  
What do those faces tell you Everywhere I go, different faces I see  
Faces  
All around different faces I see  
Some are happy, some in misery  
They express joy and pain  
No two faces are the same.  
Playing with your life, playing with your soul  
You all scream out "I'm the one in control"  
Killing of the colours, silly stupid games  
You know who you are without no names  
Don't mess the world 'cause that the sequal  
Open your mind cause we talking about the people  
In the world, all kind of places  
Different races, different faces Different faces  
Everywhere
