Here

Pharrell Williams

My dear it seems we're here again So much for effort Isn't it clear we're here again Our thing right where we left itA delusion is a flight first class to nowhere While a dream is a blueprint A plane to go there To go thereAnd I I promise on all existence If it breathes then it is our witness We have unfinished business You and I And so my Word is I'll cross those bridges With zero regard for limits And distance, you and IMy dear it seems we're here again Was there a glitch in my method Isn't it clear we're here again Let's get new GPSSo next time you see this place Remember we were alone We'll bring our children from home That's right, oh yeah I'm gonna go thereAnd I I promise on all existence If it breathes then it is our witness We have unfinished business You and I And so my Word is I'll cross those bridges With zero regard for limits And distance, you and IWell, anyone think they can do it better Well come on Come one But back to you Hold on girl we can make it Stack whatever on top I can take itIt seems we're here again This is the right trajectionAnd I I promise on all existence If it breathes then it is our witness We have unfinished business You and IAnd so my Word is I'll cross those bridges With zero regard for limits

And distance, you and I
