

Start It Up

Ziggy Marley

Bring a revolution
Front the evolution
Love's the contribution
Sing(Start it up)
Heal the wounded warriors
Raise us to victorious
(Start it up)Be the one who leads us
Right from wrong will be just
All we need is your trust
(Start it up) Start it up, yeah
Yeah
Like a lion in the morning sun
You can live like a champion
Save the world we live in
Burn down the walls of our skin
We will rise from the ashes again
Yeah, yeah(Start it up)
Bring a revolution
Front the evolution
Love's the contribution
Sing(Start it up)
Heal the wounded warriors
Raise us to victorious(Start it up)
Be the one who leads us
Right from wrong will be just
All we need is your trust
(Start it up)
Hey start it up, listen nowWhen the politician take all our rights
And they shake us all down with their might
When government can shoot
Down on defenseless youth
You can see people's marches unite(Start it up)
Bring a revolution
Front the evolution
Love's the contribution
Sing(Start it up)
Heal the wounded warriors
Raise us to victorious(Start it up)
Be the one who leads us
Right from wrong will be just
All we need is your trust
(Start it up) Oh... OhIt don't take a blind man to see where the world is headed

It won't take a wise man to know that our Earth is threatened
There is no future to see, if we don't come together
Love is the chance that we take and the answer forever
Yeah, sing it with me now Start it up, start it up, start it up, start it up
Love's your contribution
Give it Like a lion in the morning sun
You can live like a champion
Now, Save the world we live in
Burn down the walls of our skin
We can rise from the ashes again (Start it up)
Bring a revolution
Front the evolution
Love's the contribution
Sing (Start it up)
Heal the wounded warriors
Raise us to victorious (Start it up)
Be the one who leads us
Right from wrong will be just
All we need is your trust (alright) (Start it up)
Bring a revolution
Love's the contribution Somebody start it up
Who's gonna start it up?
Who's gonna start it up?
What we gonna do now?
(Start it up)
