

Let It Die

Starset

I cut you into pieces
Searching for your imperfections
I had plans to make you whole
But all my threads couldn't stop the bleeding
Theres nothing left, but I'm not leaving
When all I know is youI've been looking for a way
To bring you back to life
And if I could find a way,
I would bring you back tonight
Id make you look, Id make you lie
Id take the coldness from your eyes
But you told me, if you love me
Let it die
Your eyes stare right through me
Ignore my failed attempts to
Breathe back life into your veins
But I cant start your cold heart beating
You're so far gone, but I'm not leaving
When all I know is you
I've been looking for a way
To bring you back to life
And if I could find a way,
I would bring you back tonight
Id make you look, Id make you lie
Id take the coldness from your eyes
But you told me, if you love me
Let it dieAnd you left me more dead
Than you'll ever know
When you left me alone
