

# Into the Fire (Live In Falun 2008)

## Sabaton

Sent from home overseas  
And into the unknown  
Barely landed in the jungle  
Sent on first patrol  
Sundown darkness falls  
Dig in for the night  
Ambushed in the dawn they came  
The jungle's alive  
I feel my fire starts to burn  
The heat controlling my mind  
Berserk a savage running wild  
Within me the beast starts to roar  
Now I'm ready to strike  
A creature of the night  
Into the fire  
A flame of napalm strike  
Sarge's down I'm in charge  
Vc's everywhere  
Overrun yet order airstrike  
Condemned us all to burn  
Napalm from above  
Burning friend and foe  
Chaos on the battlefield  
The jungle's on fire  
This place it's driving me insane  
Napalm it's burning us all  
This fight no man will live to tell  
Within me my blood starts to boil  
Now I'm ready to strike  
A creature of the night  
Into the fire  
A flame of napalm strike  
From above the airstrike came  
And it burned the world below  
Napalm falling from the sky  
And it leaves no man alive  
I feel my fire starts to burn  
The heat controlling my mind  
Napalm it's burning us alive  
Within me the beasts final roar  
Now I'm ready to strike  
A creature of the night  
Into the fire  
A flame of napalm strike
