

Running in Circles

POP ETC

Every time I burn, every time I burn with you
Air ends up
Back at the starts, getting back at you
Right where we left of
The harder I push the easier it gets for you
All the reasons why I can't never found words to explain this Oh, we came so close
We felt so good we can taste it
But there's nothing left to do,
It's nothing we can do to replace it
It's part of me, it's part of you
And it's wasting
No there's nothing left to do,
It's nothing we can do to replace it
Running in circles without you,
I'm running in circles without you
Running in circles without you,
I'm running in circles without you I can see your eyes, I can see your eyes looking for new life
Where it once was a heart so hard, now is a cold place
No matter how little time, I tell myself it was right
Everyday I know I can only play this way to this far Oh, we came so close
We felt so good we can taste it
But there's nothing left to do,
It's nothing we can do to replace it
It's part of me, it's part of you
And it's wasting
No there's nothing left to do,
It's nothing we can do to replace it
Running in circles without you,
I'm running in circles without you
Running in circles without you,
I'm running in circles without you
