

Back to Me (feat. Eneli)

Vanotek

Take me back, don't leave me
Don't be bad, don't hurt me
Listen to me when I say I know what you did so
When you said you let go
Did you ever think of me?
But it's going through my mind
That she's always in your mind
While I keep you there in mine
I'm now at doubt That heart has ever been found
So wait patiently
Don't you come back to me?
I'm now at doubt
That heart has ever been found
So wait patiently
Come back to me
There is something different
In the way you're speaking
Now you're harder to believe
I can tell you're distant
And I know the reason
Did you think that I won't see?
But it's going through my mind
That she's always in your mind
While I keep you there in mine
I'm now at doubt
That heart has ever been found
So wait patiently
Don't you come back to me?
Give me a reason why you said good-bye
Give me a reason for the lonely nights
Give me a reason why you did that
No need to fall on your knees
I'm now at doubt
That heart has ever been found
So wait patiently
Don't you come back to me?
I'm now at doubt
That heart has ever been found
So wait patiently
Come back to me, to me
Come back to me, to me
Come back to me, to me
