

# Enemies

Rich Brian

Word on the street, they said that you close to me  
Don't like the energy, are we friends or enemies?  
Stay away from my face, man, you give me allergy  
You just hate while I phase on another frequency  
On so many lists, but still pull up in a Lyft  
Lately I'm on my ways, listen what my guy will say  
In Airbnb's, got one hundred-thousand keys  
But you know where I stay, don't let me catch a case  
On my way to the bank, got more checks  
Last night she fucked me way too hard  
I'm 'bout to crack my vertebrae, I do more than what I say  
You just talk but when time comes you really can't locate  
I been back on my bullshit, tell your bitch to suck my dick  
You remind me of what I don't wanna be  
Be the worst, be the name in case you start an agency  
My dad is a lawyer he would tell me 'bout his days at work  
That one time he thought his partner tried to get him fucking murked  
Last time that I saw you, I gave you a lesson to be learned  
Sit down do your homework, I'ma count my blessings like a clerk  
Word on the street, they said that you close to me  
Don't like the energy, are we friends or enemies?  
Stay away from my face, man, you give me allergy  
You just hate while I face on another frequency  
On so many lists, but still pull up in a Lyft  
Lately I'm on my ways, listen what my guy will say  
In Airbnb's, got one hundred-thousand keys  
But you know where I stay, don't let me catch a case  
Repping red and white so hard I barely can control it  
I don't care 'bout relevance, I write my bars then I go drop it  
Popping mollies not important, on the uppers, I'm in heaven  
Ready for the revelation and the best for all my bretherens, aye  
Eating on that Frito Lay, give a fuck what they gon' say  
Girl from Hawaii told me that her name was Lilo, ayy  
And that pussy bald, look like it just got a chemo, ayy  
Damn, that wasn't cool, honey mustard's got a better taste  
I do know what you want, I'm gon' never give it up  
I can make you disappear for just a couple hundred bucks  
Tryna play me, good luck, young and sharp just like a cut  
Get your extras like the first time in the club  
Word on the street, they said that you close to me  
Don't like the energy, are we friends or enemies?  
Stay away from my face, man, you give me allergy  
You just hate while I phase on another frequency

On so many lists, but still pull up in a Lyft  
Lately I'm on my ways, listen what my guy will say  
In Airbnb's, got one hundred-thousand keys  
But you know where I stay, don't let me catch a case
