

# Thousand Miles

Tove Lo

Too far away to feel you  
But I can't forget your skin  
Wonder what you're up to  
What state of mind you're in  
Are you thinking 'bout the last time  
Your lips all over me?  
'Cause I'd play it in a rewind  
Where you are I wanna be  
Wanna fly to you like birds do  
Straight across the world  
My body, your hands, uh  
And I'm missing every word.  
You are mine, yeah you say so  
When you call me late nights  
But I wonder how should I know  
You're in love enough to fight  
Fading away, when you're drunk and alone  
Can't see myself in your heart anymore  
Telling yourself you don't feel like before  
And that's when I run  
All of these thousand miles  
That's when I run  
All of these thousand miles  
To get you back  
Coming for you baby, I'm coming now  
That's when I run  
All of these thousand miles  
To get you back  
Wrapped around your fingers  
Let you dive into my low  
You remember all my triggers  
The Physical and stuff  
Back and forth forever  
Is it how it's gonna be?  
Even when we're not together  
Will you stay with me?!  
Fading away, when you're drunk and alone  
Can't see myself in your heart anymore  
Telling yourself you don't feel like before  
And that's when I run  
All of these thousand miles  
That's when I run  
All of these thousand miles  
To get you back  
Coming for you baby, I'm coming now  
That's when I run

All of these, all of these thousand miles  
To get you back  
All of these, all of these thousand miles  
To get you back  
All of these, all of these thousand miles  
All of these, all of these thousand miles  
All of these, all of these thousand miles  
To get you back  
All of these, all of these thousand miles  
To get you back  
All of these, all of these thousand miles
