## Paris

## **Little Dragon**

Oh my god, it's green Safiya. Go!It's that time to transform To come around, I'm changing Ooh, there's an angel knocking at my window Tryna tell me where to go next It's a small town without you It feels cold, it's creepin' I'm moving on, I look ahead insteadSpirit divide, drift alone I waved her goodbye, I carried on Dreams pass, my black dress Folded on a big mess I'm changing my next flight to Paris The hourglass that tick-tock too fast for a destiny I've got a full drawer of letters Remember it was Paris you said we were gonna meet Why your answering machine's still on? It's the oddest feeling since you're gone A part of me drift away with you And would never returnSpirit divide, drift alone I waved a goodbye, I carried on Dreams pass, my black dress Folded on a big mess I'm changing my next flight to Paris Spirit divide I waved a goodbye Dreams pass, my black dress Folded on a big mess I'm changing my next flight(French part)
