

Mattress (Valley Girl Remix) [feat. Allie X]

Leland

I see you lookin' around
I know you're making eyes
And I can't take it anymore
I know what happens next
I got it memorized
Tell me what you need another for You're the first place my mind goes
And the last place I wanna go tonight
But not just for a drive by
See the sun with my eyes closed
And the moon out the window
I might, but that's only in my mind
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress I know it's getting close
To when the party ends
And everybody's looking up
I hate it when you say I'm such a good friend
And that you call me when you're up You're the first place my mind goes
And the last place I wanna go tonight
But not just for a drive by
See the sun with my eyes closed
And the moon out the window
I might, but that's only in my mind
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress
When all I want's my body on your mattress
When all I want's my body on your mattress
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress
Why do I always do this to myself?
I let you go with someone else
When all I want's my body on your mattress
