

Hug of Thunder

Broken Social Scene

Many years before I kept track of the years I felt I would
Look back otherwise why did I write
down everything that entered my mind
Check out these lines like I'm staring and I'm soon
ticking when it is closed
In twenty holes how could I say what point I will gain perspective later
on
No, I had to survive it by the soundtrack made of our short lives
Making sense of hologram

ecology

I'll be up crying, nursing into grace and
Hiding in the pages adding up to me
Eternity
'Til I live

It's like a topography that is made of cartography of me
All those feelings everyday the bus stop pulls to size up the entire world
And while I broke your tubes and carving at me all the times I had done you wrong
I hope I'm sorry, certain times in our lives come to take up more space than others
And time's
gonna take it
Time that Kenny said I broke in over the summer

It was the evening when he climbed that Jeep
I was afraid what he was doing inside so I
Followed him to stop a robbery
All along we're gonna feel some numbness

Oxymoron of our lives
Getting fed up by the hunger
Supersize we found inside
He will know what's real or numbness
Catching up and climbing life
Speaking like a hug of thunder
Lit up by the lights of dusk outside
All along we're gonna feel some numbness

Oxymoron of our lives
Getting fed up by the hunger
Supersize we found inside
They won't know us by our numbers
Catching up and climbing life
Speaking like a hug of thunder
Lit up by the lights of dusk outside
It was a military base across the street
We watch them training while we all eat
It was a military base across the street
We watch them training while we all eat
We watch them training while we all eat
