

# Trap Doors

## Broken Bells

Walk out before you make it worse on yourself  
Now's not the time for that elegant laugh  
Digress from the people once by your side, once by your side  
But now that it's over, you have to pick up and start again, start again  
Falling to earth and you're  
calling it out  
You're burning yourself and your challenge to winter  
Gotta clip the lines and move for yourself, just move for yourself, love  
Now that it's over, you have to pick up and just watch your back  
Watch your back  
And close your eyes to us, fight fire  
Trap doors to endless wisdom  
Young lad, have we grown too tired longing to find?  
Learned that in time, you want it to end  
Your life at this temperature, life underwater  
You gotta let these fools all trample themselves  
They trample themselves just dying to enter  
You're preaching to the choir so turn around, turn around  
And close your eyes to us, fight fire  
Trap doors to endless wisdom  
Young lad, have we grown too tired longing to find?  
And close your eyes to us, fight fire  
Trap doors to endless wisdom  
Young lad, have we grown too tired longing to find?
