

Drift

Astra

High in the silence it's getting louder from the place we used to be
with the .fading is like .being dream to world
the moving slowly to the voices in my head
from the one waiting here
I came to save your time
'cause mine today from the one waiting here
I came to save your time
away
Please show me the way to every motion
please take us away so we can be here
I came to save your time
Please show me the way to every motion
please take us away so we can be here
Ahh
