

No Strings (DJ Jazzy Jeff Remix Instrumental)

Mayer Hawthorne

I saw you looking at me girl
When I first set foot into the room
You didn't want me to see girl
You didn't wanna lay your cards so soon I see you mulling it over
You wonder what your friends might think of you
Angel on your shoulder
But you know just what you want to do No I don't need to know a thing about your past
No I just want one night with you no strings attached
And I know that we might not be the perfect match
And i just want one night with you no strings attached
I know you wanna be good girl
But you imagine what i'm like in bed
You try to push it aside girl
but it already went through your head It's one o'clock in the morning
And you're buzzing like a honey bee
Oooh and you're trying to control it
When you wanna just come home with me No, I don't need to know a thing about your past
No I just want one night with you no strings attached
And I know that we might not be the perfect match
And i just want one night with you no strings attached
No I don't want to think this through
I just want one night with you
No I don't want to think this through
I just want one night with you
