

# Nightfall

## Little Big Town

Take me back to where we started  
Shadows dancing on the floor  
Let the dark help us remember What we're fighting for Full moon making magic  
Light a candle, let it cast a spell  
I can't hide the way I want you  
Baby, can't you tell? Turn the lights down, we can watch the stars crawl  
You and I fall, baby, when the night falls  
Throw a spark, we can shine underneath it all  
You and I fall, baby, when the night falls From sunset to sunrise  
I'll be the keeper of your heart  
I'll be here right beside you  
Through the darkest part  
Heaven's just above the Milky Way  
Stay right here and be my saving grace  
Straight on until the morning  
Don't you be afraid Turn the lights down, we can watch the stars crawl  
You and I fall, baby, when the night falls  
Throw a spark, we can shine underneath it all  
You and I fall, baby, when the night falls I've been dreaming of a night like this  
Put my name on your midnight list  
You and I fall (You and I fall, you and I fall)  
You and I fall when the night falls Turn the lights down, we can watch the stars crawl  
You and I fall, baby, when the night falls  
Throw a spark, we can shine underneath it all  
You and I fall, baby, when the night falls  
I've been dreaming of a night like this  
Put my name on your midnight list  
You and I fall (You and I fall, you and I fall)  
You and I fall when the night falls You and I fall (You and I fall, you and I fall)  
You and I fall (You and I fall, you and I fall)  
You and I fall when the night falls
