

# Center of the Universe

## Axwell

The shadow of your smile  
Under the open skies  
As I close my eyes  
I can feel the wind arise We're made of stardust  
Our lives ahead of us We'll ride the magic bus into the heart of love I can taste it, taste the feeling  
of the blue skies they're for real and  
we're the center of the universe  
Just you and I, and I, and I  
The shadow of your smile  
Under the open skies  
As I close my eyes  
I can feel the wind arise We're made of stardust  
Our lives ahead of us We'll ride the magic bus into the heart of love I can taste it, taste the feeling  
of the blue skies they're for real and  
we're the center of the universe  
Just you and I, and I, and I  
I can taste it, taste the feeling  
of the blue skies they're for real and  
we're the center of the universe  
Just you and I, and I can taste it, taste the feeling  
of the blue skies they're for real and  
we're the center of the universe
