

# Bodies

Wafia

There was something in the fallout  
Ain't it funny how the wind blows  
We give them something to talk about  
And they're locking up their windows  
And even when the night hits  
All of the light have got us running  
We ain't got to be reckless  
But you'll never stop coming All our friends are watching us  
How did it become so serious  
Something in the air is dangerous  
Everybody here is watching us We're just bodies, we're just bodies in the night  
Move your bodies, move your bodies in the light  
Trust nobody, trust nobody in the fight  
We're just bodies, we are bodies in the night  
Bodies in the night  
We are bodies in the night Telling us to let go  
Saying the uprising ain't right  
But this is for us, what do they know  
And we could do it all night All our friends are watching us  
How did it become so serious  
Something in the air is dangerous  
Everybody here is watching us We're just bodies, we're just bodies in the night  
Move your bodies, move your bodies in the light  
Trust nobody, trust nobody in the fight  
We're just bodies, we are bodies in the night We are bodies in the night  
Bodies in the night  
We are bodies in the night  
All our friends are watching us  
How did it become so serious  
Something in the air is dangerous  
Everybody here is watching us  
All our friends are watching us (watching us)  
How did it become so serious (serious)  
Something in the air is dangerous (dangerous)  
Everybody here is watching us We're just bodies, we're just bodies in the night  
Move your bodies, move your bodies in the light  
Trust nobody, trust nobody in the fight  
We're just bodies, we are bodies in the night We are bodies in the night  
We are bodies in the night  
Bodies in the night We are bodies in the night
