

# Blind Following

## Benefit

"Uh He... he is an enemy of our religious teachings."

"I know... you want him... eliminated?"

"Precisely."

Through out history, mans great mystery

From continent to continent

A recipe for hypocrisy

A multitude of killin

The worlds biggest villain

Continuously fed ignorance and blood spillin

Kill more people than AIDS

And more people than raid

In combat by troops with explosive hand grenades

So people hold poisonous snakes in his name

So people like to concentrate and self inflict pain

Emaculation brought on decapitation

Situations unbearable for human habitation

Devastation rain from nation to nation

A fool with a cause equals self-defecation

Blind to the facts when reality attacks

Just turn your back, mumble some words then relax

Proud of what you say? But you act a different way

Keep on judging others and your pain will go away

Raise your children wrong with exception strong

And they'll walk a crooked path difficult and long

To declare it and understand incoherent

Leaves a person the weakness despite transparent

Take a look around you not just in the front

Watch ya pockets real close and beware of a skun

All the dark secrets built up for a while

Can be hidden on Sunday with a suit and a smile

(Chorus) x2

"I believe what I say"

"That's quite obvious"

"They BELIEVE what he says"

Scratches

"I believe what I say"

Scratches

"BELIEVE what he says"

"And think of it, the people believe..."In the past, nothing stood in its path

Even women and children felt the wrath of the bloodbath

Believe what I believe or face death

If you disagree then you'll have no face left

That was a sentence; ultimate and it was repentant  
Become a mortar and be buried in the trenches  
The same tradition that's carried on today  
But instead of blades swinging, bullets ricochet  
Anti abortion advocates throw pipe bombs  
While the ignorant gather to worship icons  
No independent thought; sanctity bought  
At the price of a life and they thankfully fought  
Robots in the light, programmed to recite  
Words that'll make the dog night run in fright  
This thing is very dangerous when in the wrong minds  
And evidence finds that this shit easily blinds  
In the human existence, take death for instance  
The topic of discussion can shorten the distance  
Be careful of the food you bite  
And when digestin it, keep your own thoughts in sight  
Puppets move by a common thread  
Never taken the time to let thought in the head  
Instead, eatin all the bullshit they fed  
Thats why nintey-percent of the world is mentally deadRepeat Chorus
