

# Hang On a Little Longer (feat. Ruelle)

## UNSECRET

Do you see the light  
At the end of the tunnel?  
Flickering for you If you hold on tight  
You'll come out of the rubble  
Stronger than you knew It's hard to find the will to fight  
When all you can do is survive  
But it's waiting on the other side It's gonna get better one day  
The pain is gonna fade away  
If you just hang on a little longer  
Hang on a little longer  
If you got hell to pay  
Your miracle is on it's way  
If you just hang on a little longer  
Hang on a little longer  
Try to drown it out  
But the whisper of hope rings loud  
And echoes in your room  
It's the only sound  
That swallows all of the doubt  
That tries to cripple you 'Cause when nothing in you wants to fight  
And all you can do is survive  
Just let it open up your eyes It's gonna get better one day  
The pain is gonna fade away  
If you just hang on a little longer  
Hang on a little longer  
If you got hell to pay  
Your miracle is on it's way  
If you just hang on a little longer  
Hang on a little longer  
It's waiting on the other side  
If you open up your eyes  
You can find the will to fight, deep inside It's gonna get better one day  
The pain is gonna fade away  
If you just hang on a little longer If you got hell to pay  
Your miracle is on it's way  
If you just hang on a little longer  
Hang on a little longer Do you see the light  
At the end of the tunnel?  
Flickering for you
