My Disease

A Skylit Drive

Awaken to the eyes of glazed humor
The haze in my somber eyes . it burns . so cold
The things you wish you could knowAs he enters into the world as a ghost
The terror inflicted scrapes your bones
Let him hold you close"look" where "over there" oh I see what you mean
Fear me
Step too close to see what I see
Construct desire
The fine line between disease and what I needAs he enters into the world as a ghost
The terror inflicted scrapes your bones
Let him hold you close
It's exactly what it seems
The horror I live

Lyrics provided by http://counterlikes.com/

The evil that beats inside me It's called "my disease"
