## **Stars and Sons**

## **Broken Social Scene**

Then when you let it You asked for nothing Why don't you share it All of the time you live There's something out thereThis one will know, how far to live on This one will ever know in this town And in the red room At a distance How would you know it You're the same when you're living I don't know it It won't be this This one will know, how far to live on This one will know, how far to live on All of the time you wait, there's someone out there And no one can find all the red How would you show it You can see through the red I don't know it It won't be this timeThis one will know, how far to live on This one will know, how far to live on Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
