

# Face to the Floor

## Chevelle

To pick up the tip doesn't mean a lot  
Feel inside your drugs  
If we own the night, then spread it out  
Or pack up without a clue Well, cause by their own  
And by default  
Time to find the noose  
Like your face being forced to the floor I got a taste of the benefits  
Five foot in change  
There's no better way to hash it out  
So let's set up your time to bail  
Well, cause now the cracks Should we intervene?  
I hold this albatross  
Like your face being forced to the floor  
When either way, you're way too close to it all Pay up, never wait 'em out  
Cover me up, take it all Take it all  
You're  
My Last Take it all away... right back down  
You  
Less  
Bless  
Pay up, never take it all  
Take it all  
Like your face getting forced to the floor  
When either way, you're way too close to it all  
Like your face being forced to the floor  
Either way, you're way too close to it all  
Too close to it all
