

Step Down

Elliphant

I'm home, home alone
I call, call again you not
answering
And I know
You couldn't, you wouldn't dare
To tell me I win this, you swear
You busy but I know you don't care
So don't cry man,
cause I just wanted a friend tonight
You hot, I'm cold that's why I
Thought we could make a cloud run
You can't get no higher
Fuck yeah,
you're not my type at all
Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate
Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate
You played all your flute all day
Never heard a word
Drippin' from your wodka's
You got shit to say bullshit me will I
Don't think just
I own my emotions
Shit happens and I still just want a friend tonight
You hot, I'm cold that's why I
Thought we could make a cloud run
You can't get no higher
Fuck yeah, you're not my type at all
Why don't you just step down? (why don't you just step down?)
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate
Why don't you just step down? (why don't you just step down?)
Why don't you just step down from your high?
Was this from where you

Can't see a thing you miss
I don't so much mate
Say whatJump downHey
So jump downYou hot, I'm cold that's why I (why don't you just step down?)
Thought we could make a cloud run (why don't you just step down?)
You can't get no higher (you step down)
Fuck yeah, you're not my type at all (fuck yeah)
Why don't you just step down? (just step down)
Why don't you just step down from your high? (from your high)
Was this from where you
Can't see a thing you miss
I don't so much mate
Why don't you just step down? (step down)
Why don't you just step down from your high? (step down from your high)
Was this from where you
Can't see a thing you miss
I don't so much mate
