

# iRobot

Jon Bellion

I was a human, breathing and thinking  
Eating and drinking, philosophizing  
I was a human, before you killed me  
And ripped my heart out, I knew what love was Now when they ask me, I just reply slow  
And sound like an iPhone  
I do not know love, I am a robot, ba ba ba ba bam bada ba  
I do not know love, I am a robot, ba ba ba ba bam bada ba  
I used to know love  
Cause I had a fire, passion and desire  
Now all I require are circuits and wires  
Inside was an ocean of soul and emotion  
Then you cut me open, now all that I know is I am a robot, thoughtless and empty  
Don't know who sent me, don't know who made me  
Electric robot, everything's gray now  
Numb to the pain now, I knew what love was Now when they ask me, I just reply slow  
And sound like an iPhone  
I do not know love, I am a robot, ba ba ba ba bam bada ba  
I do not know love, I am a robot, ba ba ba ba bam bada ba  
I used to know love Cause I had a fire, passion and desire  
Now all I require are circuits and wires  
Inside was an ocean of soul and emotion  
Then you cut me open, now all that I know is  
I am a robot, I am a robot  
I used to know love  
Cause I had a fire, passion and desire  
Now all I require are circuits and wires  
Inside was an ocean of soul and emotion  
Then you cut me open, now all that I know is I am a robot
