

# That's How You Know It's Love

Deana Carter

If you get out in the drivin' rain  
Stand in the eye of a hurricane  
And never think twice If you turn your back on selfishness  
And your thoughts are for someone else  
'Cause they changed your life That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love When your heart insists that you give it all  
When you no longer fear the fall  
And you just let go  
When the past is finally dead and gone  
Fate leads you somewhere to the one  
That has your soul That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love No part of you questions, no part of you doubts  
You're only sure this is what love's about  
Nothin' and no one can stand in your way  
Or keep you from sayin' what your heart is dyin' to say That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love  
That's how you know it's love  
That's how you know it's meant to be  
That's how you know it's love  
That's how you know it's love
