Please Don't Turn Me On (feat. Lifford)

Artful Dodger

Mmm-hmm I mean it (I mean it) Don't say it, babe (don't say it, babe) Hear me now now Said ah, please don't turn me on No, no listen, listen Baby, won't you keep your distance You're getting too close to me I've been feeling my resistance Melting away But she said she wouldn't mind If I spent a little time Said you were a friend of mine She could trust me out of sight Now two bottles later on And I think I stayed too long I forget where I belong Saying please don't turn me onIt's getting late I know I should be gone Don't push me 'cos I'm not that strong (no, no, no, no) You can never make it right from wrong (no, no, no, no) Please don't touch me there Stop playing with my mind it's not fair When you know I've got another who cares And she's waiting for me somewhere out there, yeah Don't say my love is too familiar (aaww) 'Cos she's everything to me Don't say what she don't know won't kill her (ooh) I'm playing away Put your hands where I can see Baby, you know what I mean 'Cos you're looking good to me And you know I feel the heat As you button up your dress And I wake up in your bed With a head full of regrets Saying please don't turn me onIt's getting late I know I should be gone Don't push me 'cos I'm not that strong (no, no, no, no) You can never make it right from wrong (no, no, no, no) Please don't touch me there Stop playing with my mind it's not fair When you know I've got another who cares And she's waiting for me somewhere out there, yeahDon't want to lose the love I have

'Cos once it's gone can't take it back You know that I want to Don't matter what I hear you say I see the look that's in your eyes (no, no) Please don't turn me on It's getting late I know I should be gone (I should be gone) Don't push me 'cos I'm not (I'm not) that strong (I'm not that strong, baby) You can never make it right from wrong (and oh) Please don't touch me there Stop playing with my mind it's not fair (oh no) When you know I've got another who cares (She cares about me) And she's waiting for me (and she loves me) Somewhere out there (and she needs me)Please don't turn me on It's getting late I know I should be gone (You know I should be gone) Don't push me 'cos I'm not that strong (I'm not that strong) You can never make it right from wrong (from wrong) Please don't touch me there (touch me there) Stop playing with my mind it's not fair
