Hold Each Other (feat. FUTURISTIC)

A Great Big World

Each OtherI miss the words we used to say
I miss the sounds of yesterday
I miss the games we used to play like ohhh
I was trapped inside a dream
I couldn't see her next to me
I didn't know she'd set me free like ohhhSomething happens when I hold her
She keeps my heart from getting older
When the days get short and the nights get a little bit colder
We hold each other
We hold each other
We hold each other
Everything looks different now
All this time my head was down
He came along and showed me how to let go
I can't remember where I'm from
All I know is who I've become
That our love has just begun like ohhhhSomething happens when I hold him
He keeps my heart from getting broken
When the days get short and the nights get a little bit frozen
We hold each other
We hold each other
We hold each other
If I'm stressing you that blessing that's sent from heaven
These days start to feel like hours and hours feel more like seconds
People judged us they couldn't see the connection
When I look at you, it's like I'm looking back at my reflection
I don't see nothing different, our pigments they coincide
We hold each other so tight they couldn't break us if they tried
My eyes are are those of the blind, I see no color or size
I feel the love in your touch and I trust what's inside your mind, ok
I know that we've been through a lot
I know that we both grew up
You know I missed you a lot
When I was young I was dumb
Didn't think you'd fit in my plot
And I appreciate the break because I love what we got now
You give me chills and I can't imagine you leaving
If I could build a perfect person honestly you would be it
And you know nobody knows you like I know you
I can't wait to come back home so I can hold youSomething happens when I hold her
She keeps my heart from getting older
When the days get short and the nights get a little bit colder

We hold each other
We hold each other
We hold each other
We hold each other
We hold each other
We hold each other
