

Silver and Gold

Little Big Town

Hangin' out with the scarecrow blues
On the other side of being used
The whine and the whistle of a passing train
Sounds so heavy when it says your name Baby when you're down, baby when you're way down
Lost your shine and your feet are cold
You don't have to stay down, you don't have to stay down
You're like silver, you're like gold
You're like silver, you're like gold
Wind caught up in the weather vane
Soaked to the bone from a summer rain
I'll be right here to send you through
The rust and the dust and the scarecrow blues Baby when you're down, baby when you're way
down
Lost your shine and your feet are cold
You don't have to stay down, you don't have to stay down
You're like silver, you're like gold
You're like silver, you're like gold
Baby when you're down, baby when you're way down
Lost your shine and your feet are cold
You don't have to stay down, you don't have to stay down
You're like silver, you're like gold
You're like silver, you're like gold
