

Disappear

[Hoobastank](#)

There's a pain that sleeps inside
It sleeps with just one eye
And awakens the moment that you leave
Though I try to look away
The pain it still remains
Only leaving when you're next to me
Do you know that everytime you're near
Everybody else seems far away?
So can you come and make them disappear?
Make them disappear and we can stay
So I stand and look around
Distracted by the sounds
Of everyone and everything I see
And I search through every face
Without a single trace
Of the person
The person that I need
Do you know that everytime you're near
Everybody else seems far away?
So can you come and make them disappear?
Make them disappear and we can stay
Can you make them disappear?
Make them disappear
There's a pain that sleeps inside
It sleeps with just one eye
And awakens the moment that you leave
Gonna search through every face
Without a single trace
Of the person
The person that I need
Do you know that everytime you're near
Everybody else seems far away?
So can you come and make them disappear?
Make them disappear and we can stay
Hold my hand and I'll go anywhere with you.
