

# Otis Redding

Sara Evans

Fireflies are out tonight  
Air is heavy and the moon is bright  
I love this time of year  
I talked to you this afternoon  
You said you didn't have very much to do  
I said I'd be here  
So come on over, come on in, come on by baby  
Otis Redding makes me feel good  
Dancin' in the kitchen barefoot  
All the windows up, just can't get enough  
Headlights on my front lawn  
I guess it didn't take you very long to decide  
To come on over, come on in, come inside baby  
Won't you come on up, come on in, come inside baby  
There's just something 'bout the way  
The way you talk to me  
You just give me what I need  
And when you come around my feet can't find ground  
I'm losin' myself like a drop in the rain  
You twist me up like a hurricane  
I can't stand up for fallin' down  
So come on up, come on in, I like it when you come around  
A minute ago there were a million stars  
And now it's soaking wet in my backyard  
Let's take cover baby  
But you just wanna run around in the rain  
You make me laugh like a kid again  
Loud and crazy baby  
There's just something 'bout the way  
The way you talk to me  
You just give me what I need  
And when you come around my feet can't find ground  
I'm losin' myself like a drop in the rain  
You twist me up like a hurricane  
I can't stand up for fallin' down  
So come on up, come on in, I like it when you come around
