## In Her Eyes

## **Basshunter**

It's a Saturday night Nothing will go wrong But if it does, do I care I just don't know how to runIt's a Saturday night And I hope you believe My heart is calling your name So hear me out when I sayI can see it in her eyes When she turns to me and smiles Everything feels so right Until the morning light (repeat) Are you ready to party? It's a Saturday night Nothing will go wrong But if it does, do I care I just don't know how to runIt's a Saturday night And I hope you believe My heart is calling your name So hear me out when I say I can see it in her eyes When she turns to me and smiles Everything feels so right Until the morning light (repeat) Are you ready? I can see it in her eyes
