

# That Night (Wahoo Remix)

## Jazzanova

It happened, that thing happened, that magic happened, that night  
Something's coming over me  
Haven't been the same since that evening  
That I put eyes on you  
Filled me with life changing feelings  
Now its all a memory  
Where you are is a mystery  
I'll do almost anything  
To get back to that night I miss you  
I wish that you were here with me  
It felt so true  
But it only happened that night  
(It only lasted that night)  
Only that night  
Instant chemistry  
Something like a spiritual connection  
You felt it too  
That's why your body came in my direction  
Was it all a dream?  
Since then your face I haven't seen  
I'll do almost anything  
To get back to that night I miss you  
I wish that you were here with me  
It felt so true  
But it only happened that night  
(It only lasted that night)  
Only that night  
Why do you have to be so far away far away  
Wish i could be with you everyday (everyday)  
Was it real or was I imagining things?  
I'll do almost anything (anything)  
To get back to that night I miss you  
I wish that you were here with me  
It felt so true  
But it only happened that night  
(It only lasted that night)  
Only that night Get back to that night babe  
Get back to that night babe  
It only happened that night babe  
It only happened that night babe
